Dear Mr. or Ms.,

I am in search of a position in the area of data analytics and I am hoping you can look at my resume.

I will be graduating from Liberty University with a 3.0 GPA and obtaining a degree in Healthcare Informatics with a focus on data analytics. I have completed classes in computer science, cybersecurity, and healthcare informatics as part of my studies for my major. I have also taken a 24-week data analytics course at the University of Richmond to expand on my coding skill set. While it is hard to list everything, I have learned in this course, the major programming skills I learned include, but are not limited to, Python, JavaScript, R, Tableau, SQL, and NoSQL languages.

My previous work experience includes working at the WestRock Corporation in the engineering department managing AutoDesk, AutoCAD, and AutoDesk Vault. I also worked at VCU Health Systems for two summers in patient accounting and preoperative surgical services departments.

My long-term goal is to find a data analytics position where I can use the skills I have learned. I am interested in any open positions where I could use my work and educational experience.

I have included my resume for your review and I can be reached at 804-536-7471 or [rachelcbrinkley@outlook.com](mailto:rachelcbrinkley@outlook.com).

Thank you for your consideration.

Sincerely,

Rachel Brinkley
